

Packing List Fiori App — Delivery Sign-off

System KSD (client 500) · 23 Jul 2026 · clean-core replacement for the 14-transaction ZPLIST family

Status: DELIVERED & WRITE-PATH VERIFIED

Backend active, OData V4 service published, app deployed, FLP tile resolves and renders live data. Create / Change / Delete actions confirmed to persist against the box table **ZPP_PACK**.

Area	Result
Read model	ZI_PACKING_LIST sources ZPP_PACK directly — Plant, Material, Grade, NetWeight, PackListDate, Status all populated
Actions	Instance-bound (createPackingList / changePackingList / deletePackingList). Selected boxes arrive in handler keys (Box
Write test	Box 992000000/2020: create set PackListItem 0->999999, PackListDate null->2026-07-23, Status O->P; PERSISTED a
Restore	deletePackingList -> BoxesAffected:1, box unassigned. Confirmed clean.
Saver class	Not required. Unmanaged actions run direct SQL; OData action request LUW commits. No COMMIT WORK in handlers
Frontend	Worklist invokes each action once per selected row's context; Create/Change open a dialog for SalesOrder / SalesOrder

Live objects on KSD (package ZKGPL_FIORI, transport KSDK906624)

ZI_ZC_PACKING_LIST (CDS interface + projection) · ZD_PACKING_LIST_IMPORT / _RESULT (abstract) · RAP behavior defs + ZBP_I_PACKING_LIST pool · ZUI_PACKING_LIST service definition · ZUI_PACKING_LIST_04 OData V4 binding (published via /IWFND/V4_ADMIN) · BSP ZPACKING_LIST · FLP target mapping + tile (PackingList / manageKejriwal, catalog ZKGPL_BC_CUSTOM).

Retires

ZPLIST01/01A/01T, ZPLIST02/02A/02N/02T, ZPLIST03/03A/03N/03T, ZPLISTD/DA/DT (14 tcodes). Print output ZPLISTP stays a classic print program by decision.
