

KGPL — Phase 4: India eInvoice / DRC Activation — Runbook & Status

System KSD (DEV) · client 500 · S/4HANA 2025 · 23 Jul 2026. For BASIS, the India LOCALIZATION consultant, and the TAX team. Config is being built in DEV (transport **KSDK906643**) for the standard on-prem eDocument/DRC India eInvoice + eWay solution, to retire the custom ZEINV* cockpit. Solution variant: **on-prem full solution via GSP (customer API '18')** - interface type **AIF proxy (for web services)**.

1. CONFIGURED so far in DEV (transport KSDK906643)

Path: SPRO → Cross-Application Components → General Application Functions → Document and Reporting Compliance → Country/Region-Specific Settings → India → Electronic Document Processing → General Settings.

Node	What was set	Status
Define Interface Type for eDocument	EDT_EINV (eInvoice) + IN_EWB (eWay) for company codes 1000/2000/5000/6000/7000/8000, interface type = AIF proxy	DONE (GSP verified)
Map State Codes for India	SAP region 06 -> GST state code 24 (Gujarat, supplier). NOTE: SAP region 01 = GST code 01 (region 24 = Uttar Pradesh)	DONE (GSP verified)
Map Unit Quantity Codes	KG->KGS, MTR->MTR, NOS->NOS, L->LTR (table EDOINUQC, delivered by SAP)	DONE
Business Place GSTIN (Tax Number 3)	GSTIN keyed in Tax Number 3 (STCD3) of each business place - see table below.	DONE

2. Company code -> entity -> GSTIN (all Gujarat, state 24)

Co.Code / BP	Entity	GSTIN (Tax Number 3)
1000	Kejriwal Geotech Pvt Ltd	24AADCK7366F1ZI
2000	Kejriwal Industries Pvt Ltd	24AACCP3636Q1Z2
5000	Shekhawati Geotech Pvt Ltd	24AAPCS9214A1ZH
6000	Gee Filaments Pvt Ltd	24AAECG2557P1Z9
7000	Jimbh Industries Pvt Ltd	24AAECJ6721A1Z3
8000	Mango Filaments Pvt Ltd	24AAPCM2337N1Z2

The GSP issues API credentials **per GSTIN** - request sandbox credentials for all six.

3. REMAINING steps (need GSP / are go-live)

Node	Needs
Define SOA Services for Communication	GSP (API 18) sandbox WSDL/endpoint URL + credentials. EXTERNAL - the pipe to the GSP
Assign SOA Services to eDocument Interfaces	after SOA services defined
Settings for Electronic Invoicing / Way Bill	output/QR, IRN & eWay params (some from SAP Note 2884058)
Activate Source Type Documents for Company Code	Go-live switch - do LAST, after QC test vs IRP sandbox + tax sign-off

Execution rule: build in DEV (done) → transport KSDK906643 to QC → test against the IRP **sandbox** → tax sign-off → transport to PROD → activate source-type-for-company-code at a planned cutover. Run DRC in parallel with legacy ZEINV; reconcile IRN/eWay against ZEINV_AUDITLOG (Phase-3 ZC_AUDIT_LOG query) before switching ZEINV off.

4. External dependencies + authoritative source

- GSP (API 18)** sandbox endpoint + per-GSTIN credentials - for the SOA service. Chase with the GSP provider.
- SAP Note 2884058** (GST India e-Invoicing) - authoritative for statutory values (full state-code list, UoM/UQC, eDocument process specifics, the exact GSTIN field behaviour).

5. SAP Region -> GST State Code (DRAFT - verify vs Note 2884058)

Statutory. Only Gujarat (06->24) is needed for the supplier; the rest are buyer-side. Verify flagged rows.

Rg	State	GST	Rg	State	GST	Rg	State	GST
01	Andhra Pr.	37!	12	MadhyaPr.	23	24	UttarPr.	09
02	ArunachalPr	12	13	Maharashtra	27	25	W.Bengal	19
03	Assam	18	14	Manipur	14	26	Andaman	35

04	Bihar	10	15	Meghalaya	17	27	Chandigarh	04
05	Goa	30	16	Mizoram	15	28	DNH	26!
06	Gujarat	24	17	Nagaland	13	29	Daman&Diu	26!
07	Haryana	06	18	Orissa	21	30	Delhi	07
08	HimachalPr	02	19	Punjab	03	31	Lakshadwp	31
09	J&K	01	20	Rajasthan	08	32	Puducherry	34
10	Karnataka	29	21	Sikkim	11	33	Chhattisgh	22
11	Kerala	32	22	TamilNadu	33	34	Jharkhand	20
			23	Tripura	16			

! = verify vs Note 2884058 (AP/Telangana 37/36; DNH+Daman&Diu; merged to 26). Rows 35+: Uttarakhand 05, Telangana 36, Ladakh 38, Other Territory 97.

6. What this retires (recap)

Custom cockpit ZEINV / ZEINV_EXT / ZEINV_CANC / ZEINV_EWAY_BY_IRN / ZEWAY_CANC / ZEINV_UPDATE / _UPLOAD / _UPGRADE / _SETUP + config tcodes (ZEINV_CO_CODE/_DOCTYP/_STATE_CODE/_UOM/_LOGIN) + ZAUDIT_LOG (table ZEINV_AUDITLOG). Excise ride-alongs ZRG1/ZRG1N/ZRG1TEX, ZJ1IIN, ZPUREG (confirm RG1/excise with tax - GST regime). ~19 tcodes retired by config, zero custom code.

Companion: docs/PHASE4_DRC_SCOPE.md (full runbook). Config recorded in transport KSDK906643 (KSD DEV). Phase 4 is a compliance project - complete with the GSP + tax team, not the app-build track.
